... data
  collection process begins with the placement of an
  order for unpriced reporting with the **customer** 's
  account team. Specifically, the account team **places**
  the order in **real   time** using an ordering system
  component. In a periodic process, this order
  information is transmitted to...

...to the StarOE component 285, via
  messaging interface 226. The OEHubs 224 further adds
  new **customers** to the corporate order entry ("CORE")
  system component 292, which provides **customer** billing
  hierarchy information used by the StarWRS system. The
  new **customer** hierarchy information is extracted by the
  CORE system 292, and is available for pickup by...

...for Unpriced Reporting. The TVS
  additionally messages the GSE component 505 in real

time to **immediately** initiate the collection of call
detail for that number, as will be described in greater
detail herein. Due to latency inherent in the
fulfillment process, **customers** may select and receive
daily reports after CDR collection begins.
